

EARLY BIRD SPECIAL ENDS 1ST MARCH

JAP TRUCK DIAGNOSTICS

ADBLUE, DPF, EGR & FUEL SYSTEM COMMON FAULTS & TESTING STRATEGIES

In this course, Diesel Help founder and trainer **Clinton Brett** breaks down the key design features and operating principles of the **fuel, air, emissions** and **aftertreatment systems** commonly found on JAP trucks. The focus is on understanding how these systems work together — and why they fail.

Common Faults Covered on:

- Fuso Canter 515 (4P10T)
- Fuso Fighter FK (6M60)
- Hino 500 (A05C)
- UD
- Isuzu N & F Series

Live Workshop Diagnostic Demonstrations:

- **Fuel System** — Denso cylinder compensation strategy explained
- **EGR & Turbo Systems** — Understanding their diagnostic relationship
- **AdBlue & DPF** — Service procedures & testing strategies
- **Jaltest** — Key features of this diagnostic scan tool
- **Open Q&A** — real vehicle issues

The course includes **preventative maintenance strategies** to extend the service life of **AdBlue, DPF and engine systems**, reducing repeat failures and unnecessary component replacement.

COST

\$240 per person, max. 20 participants
booking essential Capricorn welcome

WHERE

GO TAFE - Fryers Street Campus Shepparton

INCLUDES

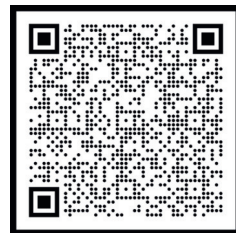

theory and on vehicle demonstration,
dinner, training manual & certificate
